

# Clip in Label Guideline

Fruit & vegetables application only

# General Label Guidelines

IFCO SYSTEMS in collaboration with growers, retailers, and label providers has developed a list of compliant labels authorized for use on our RPCs. Our RPCs are manufactured with label placement surfaces on the short side display panel. Placement of compliant labels on these surface will provide proper adherence to the surface while the RPC is in use and will allow for effective removal during our wash process. This document covers what is an approved placement area for your specific crate types. The use of any non-compliant label on our RPCs may result in enforcement action.

## IFCO recommends to use cardboard insert labels

### General Label Guidelines

- Only one label should be applied to each RPC
- Must be applied to the short panel end walls only
- Must be placed under tines/card holder prongs, with no adhesive backing
- Must not be applied on the long side panels, bottom, or inside RPCs
- Must not be wrapped around the handle areas
- Oversized pallet labels or stickers must be applied on the outer shrink wrap and not directly to the surface of the RPCs
- Use only approved labels as per IFCO specifications
- No adhesive stickers are allowed to be stuck inside the clip areas.

The only labels authorized to be placed on a RPC is a product nomenclature label that meets local regulatory requirements.

## Cardboard Label placement

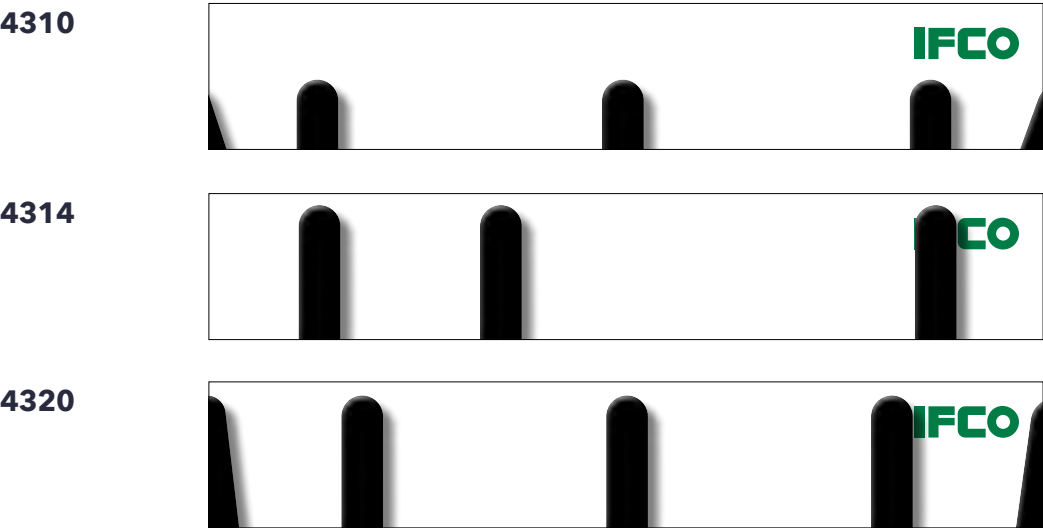

IFCO provides a handy insert clipping device on each short side of its crates to allow for the placing and easy removal of cardboard inserts. No adhesive stickers are allowed to be stuck in or around the clip areas.

# Cardboard insert dimensions by crate type

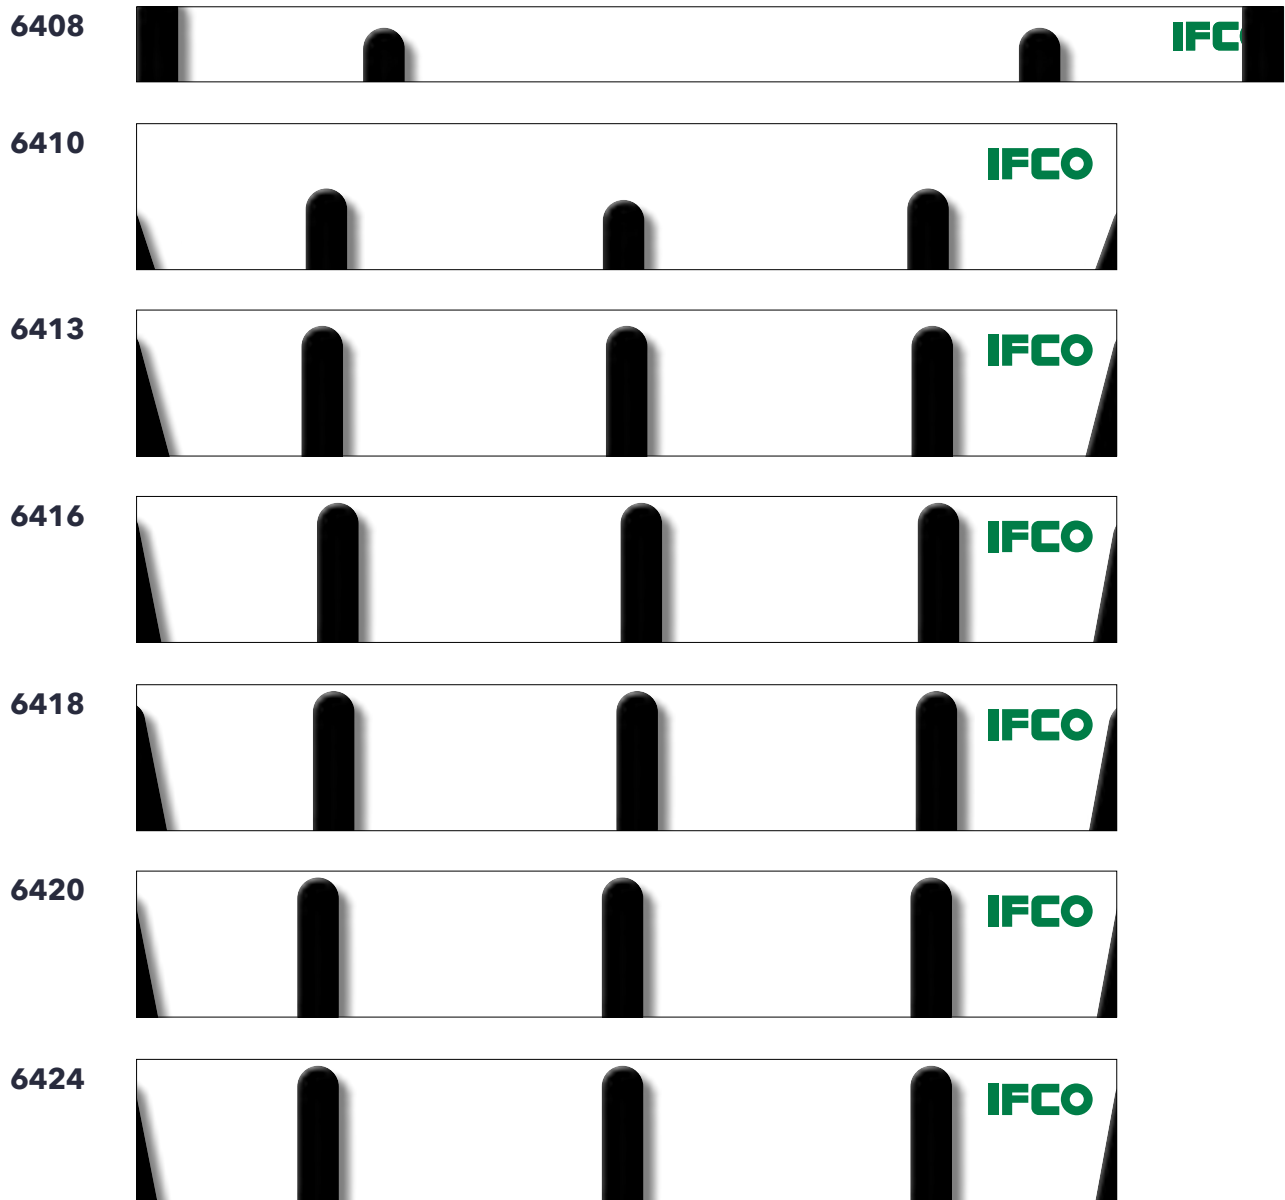

Product name	Measure	Material and paper	Application
LL/BLL 4310-4320	Width 200 mm, height 35 mm	Carton/Paper, 160 g/m², thermotransfer and -direct printable. 200 g/m², stronger grammage increases durability  No glossy paper (labels stick to the wrapping film)	To ensure maximum strength, insert in at least two latches and push towards bottom end
LL/BLL 6408	Width 275 mm, height 18 mm		
LL/BLL 6410-6424	Width 235 mm, height 35 mm
