

General Label Guidelines

IFCO SYSTEMS in collaboration with growers, retailers, and label providers has developed a list of compliant labels authorized for use on our RPCs. Our RPCs are manufactured with label placement surfaces on the short side display panel . Placement of compliant labels on these surface will provide proper adherence to the surface while the RPC is in use and will allow for effective removal during our wash process. This document covers what is an approved placement area for your specific crate types. The use of any non-compliant label on our RPCs may result in enforcement action. If you have additional questions, please email IFCOLabels@ifco.com.

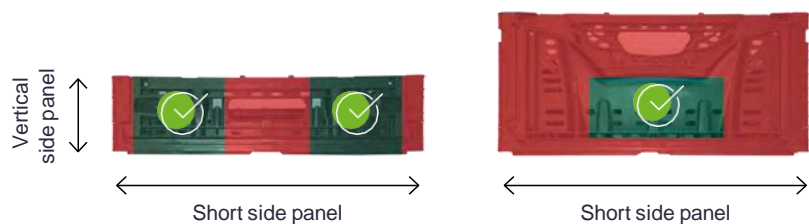

General Label Guidelines

- Only one label should be applied to each RPC and cannot be any larger than 4" wide by 2" tall (inches)
- Must be applied to the short panel end walls only
- Do not adhere labels under tines/card holder prongs, this is for cardstock only that is not glued to the RPC
- Should not be applied on the long side panels, bottom or inside the RPCs
- Must not be wrapped around handle areas
- Oversized pallet labels or stickers must be applied on the outer shrink wrap or across the banding and not directly to the surface of the RPCs
- Use only approved labels as per IFCO specifications found at IFCO.com in the "IFCO Approved Label Requirements" Document
- If use larger RPC, label should be placed on dimpled areas of short wall not on corner locks

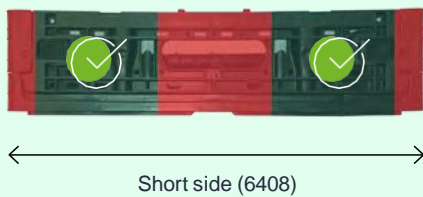

The products approved for use in the IFCO Approved Label Requirements Document are universal and can be obtained from the suggested suppliers found on the IFCO website, or your preferred label supplier as long as the label meets all specifications on the approved list. Only the exact combinations of adhesive and substrates in the list are approved for use so please order accordingly. Customers can refer to ifco.com/labeling for all approved vendors and approved labels.

Examples

- approved placement areas
- not approved placement areas

Where can the labels be placed?

- approved placement areas
- not approved placement areas
