

Global scale, local expertise: the support your business needs, where you need it

With a network of local offices and over 1,100 customer support employees worldwide, at IFCO we're there for your business.

A better supply chain serves us all. Let's eat.

IFCO was the first company to develop an outsourced RPC pooling system for fresh fruits and vegetables, back in 1992. Today, we provide unrivalled levels of customer support via our network of local offices and a team of over 1,100 employees worldwide.

Our people speak your language. And they're experts in your local market too: aware of how your business is affected by the

seasons, by local culture and by the particular challenges of your sector.

We have close working relationships with 14,000+ food producers – in every category, from fruit and vegetables to meat and fish to bakery goods – and with 300+ retailers. We work continuously with all our customers to find ways to improve their operational efficiency and reduce their overall costs.

When it comes to packing, distributing and displaying fresh products, no one can

match the breadth or depth of our expertise.

ONLY IFCO offers such a wide range of pooled equipment and solutions, with over 70 models of RPC. We have RPCs to suit every type of fruit and vegetable, including one designed specifically for bananas. And we have other RPCs optimized for meat and poultry, eggs and baked goods.

We also work with our customers to improve this range as part of a continuous research and development program.

Centralized control, local support

The IFCO pool is managed centrally, with continuous monitoring and optimization of shipments, to ensure the right equipment is always available for our customers when and where they need it. Customer services are managed locally, to ensure you can always reach someone who understands the needs and challenges of your market.

Manage your account your way

Our state-of-the-art IT systems make it easy to manage your equipment pool. These include a Web-based clearing system, track-and-trace for pooled equipment, and planning and simulation tools to optimized logistics. Our corporate finance and inventory management interface is SAP R/3.

A strong team based on strong ethics

IFCO adheres to the highest global standards in workforce safety and supplier diversity, with flexible local execution.

Proactive about your performance

We work closely and continuously with all our customers to help them improve their supply chain performance, optimize the way they work with our equipment and reduce costs. From handling tips and cube optimization to best practices at the point of sale, our account managers are always available to give you their expert advice.
