

The IFCO RPC pooling system: our advantages

A cost-effective, efficient and environmentally-friendly way to distribute fresh food.

How our pooling system works

With the IFCO pooling system, our customers share RPCs in a continuous loop, using them as and when they need them. This helps our customers reduce costs and lower their environmental impact.

We manage the entire process

We make the entire process effortless for our customers, from delivering clean RPCs to producers, to collecting used RPCs from retailers.

RPC inventory management

- Sanitation
- Asset-tracking
- Repair

Why our pooling system works

The IFCO pooling system offers our customers a full-service RPC management solution that helps them save time and money, and reduces waste.

Save money

No capital investment or depreciation, plus simpler per-trip pricing plans for all services.

Save space

No storage required, thanks to just-in-time delivery based on seasonality, promotions and pipeline coverage.

Save time

We manage the entire process from delivery to collection, sortation, inspection and sanitation.

Save natural resources

Sharing RPCs helps you save water and fuel, and cuts down on waste to landfill, reducing your carbon footprint.

Local experts to support you. Global standards to reassure you.

Local expertise

Our customer service teams have the local expertise to understand your unique business needs. They know your region and they speak your language.

Global standards

We work to global operating standards that ensure workforce safety and supplier diversity.
